

org-auto-export-pandoc

This package provides the functionality to automatically export with org-pandoc-export-* modes. It adds a hook to execute it when you save the file. It will look for the following tag:

```
#+auto-export-pandoc: to-markdown
```

You can add the tag multiple times to export to multiple formats:

```
#+auto-export-pandoc: to-markdown
```

```
#+auto-export-pandoc: to-latex-pdf
```

```
#+auto-export-pandoc: to-html5
```

You should also be able to set pandoc export parameters as described here: <https://github.com/kawabata/ox-pandoc>
